PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience shipping production healthcare SaaS and AI-platform web applications with **React, TypeScript, and Next.js**. Built frontend for two products from the ground up, from component architecture to production release. Strong in reusable component design, server/client state management (**React Query, Redux Toolkit, Redux Saga**), REST API integration, and complex validated forms. Works closely with design, backend, and QA to turn requirements into clean, maintainable, user-friendly interfaces.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Build: React.js, Next.js, Vite

State & Data: React Query (TanStack Query), Redux Toolkit, Redux Saga, REST APIs, Axios

UI & Forms: Material UI (MUI), Ant Design, React Hook Form, Formik, Yup, Responsive Design

Tools & Practices: Git, Jira, Figma, Agile/Scrum, Component-Driven Development, Code Reviews

PROFESSIONAL EXPERIENCE

Frontend Developer | Thinkitive Technology, India — Jul 2024 – Present

- **Built frontend for two products from scratch**, defining component structure, routing, page layouts, and API layer, and taking them through to production release.
- Delivered features across **6 production applications** in healthcare SaaS (EHR, CRM, care-home portal) and AI observability, covering scheduling, patient/resident charting, documents, insurance, and billing workflows.
- Designed a library of **reusable, typed React components** (tables, modals, form fields, filters, dashboard widgets) shared across modules to keep UI consistent and speed up feature delivery.
- Integrated REST APIs using **React Query, Redux Toolkit, and Redux Saga**, with caching, background refetching, and consistent loading, error, and empty states.
- Built complex multi-step forms with **React Hook Form / Formik and Yup** schema validation for clinical and billing data entry.
- Translated Figma designs into pixel-accurate, **responsive interfaces** using Material UI and Ant Design, including theme customization.
- Partnered with backend, QA, and product teams in Agile sprints to clarify requirements, debug production issues, and ship maintainable fixes.

KEY PROJECTS

ScoutITAi – AI Observability Platform React · TypeScript · React Query · MUI

- Built dashboards, an AI chatbot interface, billing, user onboarding flow, and light/dark theme management.

Nemi Care – Healthcare (Care Home) Portal React · Redux Toolkit · React Hook Form · Yup

- Developed scheduling, resident charting, discharge workflows, insurance, document management, and attendance modules.

E-Care CRM · Cinch EHR · LANA · Nota React · Redux Saga · Ant Design · REST APIs

- Contributed features, API integrations, data-driven dashboards, and healthcare workflow screens across production applications.

EDUCATION

Bachelor of Engineering – Information Technology | Dr. Vithalrao Vikhe Patil College of Engineering — 2020 – 2024
